

CMFE part of the Display project!

We are proud to announce that CMFE is a partner of the **Display Europe project**. **Displ.eu** will be a ground-breaking media platform anchored in public values. The platform provides citizens across the continent with access to trustworthy information and to a picture of Europe that is not usually conveyed by mainstream or national media.

Today, we share with you an important **grant opportunity for community media** who produce journalistic content with European relevance. Check out the call below and apply for this grant!"

Stay tuned for more information about the project and the activities that will involve Community Media.

Call for proposals

DEADLINE 6 September 2023 at 13:00 CEST

Display Europe invites **formal and informal media organisations** to **apply for a grant to produce journalistic content with European relevance**, which will be made accessible through the new platform [displ.eu](#).

This call supports media platforms to produce high quality journalistic content in all possible formats. We want to fund both local media organisations interested in expanding and connecting their work to European level, as well as outlets that have a proven journalistic record in serving pan-European audiences. Read the full call for proposals [here](#).

[Display Europe](#) is part of the **Initiative for European Public Space**, a coalition built to shape a European media landscape. The architects of “Display Europe – Democracy runs on Screens” believe in a European media, grounded in public values and inclusivity.

As a result, independent and citizen media are building [displ.eu](#), a European media platform that is open to all citizens in a twofold sense: citizens throughout Europe can receive the media translated into their own language via a central platform, and European citizens are able to contribute content to the platform via the widespread existing structures of citizens’ media.
